

Gerrit Schümann

I see myself as a corporate consultant for legal matters. Whether dealing with financing, protection of intellectual property or designing contracts – it is the long-term strategic perspective that is fundamental to building up your assets for the future.

In a regulatory environment that is not exactly free of surprises, I give you the security of solid experience in the fields of corporate financing, art market financing, fronting bank transactions, licensing and cooperation agreements, copyright and trademarks, as well as competition law. And it is that security that allows you to go beyond the confines of standardised solutions to achieve the best for your business.

If that is your goal, I would be pleased to join you in thinking beyond the here and now and in ensuring sustainable value creation through intelligent contract design for your company.
